

Hot Tub Collection

JACUZZI® HOT TUB BROCHURE

Jacuzzi®

A close-up, low-angle shot of a man's back and shoulders as he relaxes in a hot tub. His skin is wet and glistening with water droplets, reflecting the warm, golden light of the setting or rising sun. His arms are raised behind his head, and his hair is dark and damp. The background is a soft, out-of-focus blue, suggesting a calm outdoor setting. The overall mood is one of tranquility and relaxation.

The most extraordinary pause in the world.®

Our story originated when Ken Jacuzzi, age 2, was diagnosed with rheumatoid arthritis. His father invented the world's first at-home pump to provide pain-relieving hydrotherapy.

From that moment forward, Jacuzzi® has deepened its expertise in moving water, bringing joy to millions of homes around the world.

Jacuzzi® brand products are designed to restore balance and heighten the joys and benefits of hydrotherapy. Our products are enjoyed in more than 100 countries and are manufactured by thousands of employees in five countries.

Built with the same care today
Through decades of research and development,
Jacuzzi® has introduced breakthrough products that
engage the senses, nurture the body, and restore
the mind like no other.

Now we introduce our latest breakthrough -
True Water™. We've brought the power of nanobubble
technology to home spas to continually deliver clear,
sparkling water that's 99.99% chlorine-free.
There's a difference you can see, feel, and smell.

Let it all soak in

Behind this extraordinary pause is the Jacuzzi® hydromassage, a distinctive and unrivalled experience. Heat, buoyancy, and optimal massage all come together for your relaxation, joy, and well-being.

Optimal massage
Boosts circulation and releases endorphins, providing relaxation from head to toe.

Heat
Dilates blood vessels to increase blood flow, delivering more oxygen to the muscles.

Buoyancy
Creates weightlessness and 360° support, relieving pressure on joints, muscles, and nerves.

Heavy duty, light touch

Aqualibrium® produces the perfect balance of air and water. Jacuzzi® PowerPro® jets emphasise 360° air induction, to provide a unique high-volume, low-pressure massage. These exclusive jets gently deliver a deeper, more powerful massage.

The massage that's right for you

Everyone likes their massage a little different. Strategically placed Jacuzzi® PowerPro® jets target specific muscle groups with a completely tailored massage. Adjust the flow and intensity from each jet. It's the massage that's right for you.

NX

Targets the sensitive neck area with a highly focused stream to relieve tension and strain. Move nozzle to personalise massage direction.

FX

Exclusive spiral design focuses on smaller muscle groups with an energetic impact, stimulating pressure points in the shoulders, back, and feet.

MX

The original performance therapy jet. The MX includes a completely adjustable nozzle with a 60° range for bold, high-volume massage action right where you need it.

RX

Delivers a full-coverage massage—producing a powerful kneading motion to relieve muscle tension, primarily in your middle and upper back.

PX

Soothes discomfort in the hands and wrists by providing relief to pressure points on the hands, and gently pulsing on palms and wrists.

BX

Its patented design, developed to reinvigorate leg muscles, delivers a stimulating massage with our highest air-to-water ratio for a bubbly effect.

Please be seated

Decades of expertise drive our design process, to deliver personalised comfort. The collection of seats in each Jacuzzi® Hot Tub facilitates full-body hydromassage, while balancing the flow to every seat for the best experience.

A

B

C

A

FX-IR therapy seat

Neck, shoulder, and back relief

A collection of FX jets combines full back and neck hydromassage with Infrared and Red Light therapy that targets deep tissue within the lumbar region of the lower back. It's an unprecedented and rejuvenating hot tub experience.

B

MX therapy seat

The original in low-back relief

Ease into this deeply contoured seat to release tension in the lower back with a high-volume, low-pressure massage. Maximised air output delivers a soothing deep-tissue massage. Paired with neck jets for a fully relaxing experience.

C

RX therapy seat

Comforting back and shoulder relief

A ring of spinning RX jets targets key back and shoulder muscles to soothe stiffness and release tension, while neck jets add further relief. It's a key part of our highest performing hydromassage.

Each seat is sculpted with an ergonomic focus, to cradle the contours of the body. Specialised Jacuzzi® PowerPro® jets—recessed for your complete comfort—are thoughtfully positioned to effectively target key muscles.

ProAir™ lounge
Full-body relief

Designed to distribute body weight evenly for a comprehensive massage. The ProAir lounge eases tension in the shoulders and back, by combining FX and FX-R rotational jets along the center of the back. Exclusive BX jets target the calves with an invigorating, bubbly massage, and FX jets penetrate the muscles of the feet with therapeutic relief.

A new frontier in wellness

Another first from Jacuzzi® , we have introduced our exclusive Infrared and Red Light therapy across a full range of wellness products—from saunas, to swim spas and hot tubs. It works in harmony with hydrotherapy to soothe and rejuvenate beneath the surface.

IR

Rejuvenation meets relaxation
The rejuvenating powers of Infrared and Red Light therapy work together deep beneath the skin's surface to relieve pain, improve range of motion, and help you reach a state of mindfulness.

Relief where it's needed most
Low back pain is the leading cause of disability worldwide,¹ so we strategically placed IR and Red Light therapy to target deep tissue within the lumbar region of the lower back.

Backed by research
Substantial evidence supports the efficacy of IR and Red Light therapy to relieve low backpain.² To ensure safety, it's been tested by certified third-party Intertek® test laboratories.³

● IR + Red Light

Relax while the water goes to work.™

A holistic approach to water care

Every Jacuzzi® Hot Tub includes filtration and water treatment technology, to deliver exceptional cleaning power and reduce the need for chemical sanitisers.

UV-C technology is standard on all Jacuzzi® Hot Tubs not fitted with True Water™

Clean water, less effort

Harness the power of active oxygen for a hands-free approach to water care. ClearRay Active Oxygen® System works harder to clean the water longer. A UV-C bulb is directed toward the water, which then creates active oxygen molecules that break down and neutralise contaminants.

They clean more, so you clean less.

5-Stage¹ filtration process

Cleaner² water means fewer water changes and less effort for you.

Stages 1 and 2

The skimmer and unique mesh ProCatch™ bag work together to clean the surface water and trap large debris for easy removal.

Stage 3

This exclusive system features a ProClear® filter, connected directly to a ProStream™ filtration pump, that filters an incredible 35 gallons per minute, giving you clean water, faster.

Stage 4

The ProClarity® polishing filter polishes the water down to a 3-micron level.

Stage 5

The ProClear filter activates and cleans when you are using the hot tub. This doubles the filtration when you need it most.

1 Stages of filtration may vary by collection.

2 Clean is defined as the removal of microscopic (down to 3-micron level, varies by model) debris from the water.

The most beautiful water

Pure. Fresh. Clear. Sparkling. The most extraordinary pause in the world starts with the most beautiful water. We are proud of our commitment to bring you exclusive, innovative water care technologies in all our hot tubs, as we strive to bring the natural joys of wellness to people everywhere.

Welcome to the next generation of water care

Jacuzzi is delivering the most beautiful water with the True Water™ system. Inspired by nature, True Water™ makes spa water fresh and clear without all the harsh chemicals. Trillions of oxygen-filled nanobubbles continuously scrub away contaminants to deliver clear, sparkling water that is 99.99% chlorine-free. That's even less than drinking water.¹

You'll see, feel, and smell the difference.

TRUE

A breakthrough in clean¹ water
True Water™ brings the revolutionary power of nanobubble technology to home spas—the same clean water technology used by NASA spacecraft.² Inspired by nanobubbles produced in nature by crashing waves and waterfalls, True Water™ releases trillions of oxygen-filled nanobubbles—5,000 times smaller than a grain of sand. They remain in the water for days, oxygenating the water to deep clean every part of your spa.

Truly easy to care for
Most spas require daily upkeep, but with True Water™ you only need to spend about 15 minutes per month caring for your water. The magic of True Water™ means you'll spend far less time maintaining your hot tub and more time relaxing in it.

You'll only find it in a Jacuzzi® Hot Tub.

Nanobubble
invisible to the naked eye

Microbubble
the size of a pollen grain

Fine Bubble
the size of a poppy seed

True Water™ is standard on J-LX® and J-400® and is optional on J-300® Collections from July 2025

¹ Clean is defined as the removal of microscopic (down to 3-micron level, varies by model) debris from the water.

The serenity is in the details

We design spas that run for years with minimal care. Durable, reliable, and built for your pleasure, from the quality of materials to the performance you expect.

A

ProLast™ cover

Lock heat in with our durable ProLast™ Cover. The vacuum seal retains heat and maintains water temperature longer for lower operating costs.

B

Illuminated waterfall

A cascading stream of water with soothing sounds creates a calming ambient atmosphere.

C

ProFusion™ shell

Highest-quality acrylic, a bonded vapor barrier, and a resin composite provide superior durability, even in extreme temperatures.

D

High-performance energy-saving insulation

Insulation surrounds the shell and fills the cabinet, resulting in lower operating costs, quieter operation, and reliable performance in the coldest climates.

E

Tool-free cabinetry

Durable, maintenance-free cabinetry withstands heat and cold and stays beautiful longer.

F

SmartTub®

Patented Cellular and WIFI smart technology for ease of hot tub control and management.

G

Propolymer base

This strong, rugged foundation protects and insulates the spa from moisture and the elements.

Tap into total relaxation

Our patented, industry-first SmartTub[®] system is more than an app. It's like a remote control and command centre that lets you monitor, operate, and protect your Jacuzzi[®] Hot Tub. It's the smartest and easiest way to use and care for your spa.

Control

You can adjust temperature, jets, and lights, and lock down your hot tub to prevent usage. Set up your own automated usage schedule, receive alerts, and check your hot tub status, whether you're at home or on the go.

Convenience

SmartTub[®] provides remote monitoring and control anywhere in the world through smart phones, smart devices, and wearables, as well as AI helpers like Siri[®], Alexa[®], and Google Assistant[®].¹ You can also track energy usage reports and enjoy new features, which are updated automatically. Plus, SmartTub[®] performs daily diagnostic checks to help ensure peak performance.

¹ Siri, Alexa, and Google Assistant are registered trademarks of their respective owners.

Energy efficiency

Smart Heat Mode helps you optimise savings by using your hot tub in the most energy-efficient way possible, such as heating hot tub water during off-peak hours. It lets you monitor, track, and customize hot tub usage, and can reduce standby power up to 25%.

SmartTub® also dynamically calculates and displays real-time savings and includes a one-touch Holiday Mode that automatically minimises water heating while you're away.

Peace of mind

With SmartTub®, you can connect via cellular and use Wi-Fi as a backup. It chooses the best connection for you and switches when needed to ensure you have reliable connectivity in all environments and situations.

Integrated sensors send automatic alerts to you if your hot tub needs attention. It can also detect power outages to help protect against freezing or overheating. SmartTub® will even send maintenance reminders to keep your spa running optimally for years.

There's a Jacuzzi® Hot Tub for every kind of space

Is your dream hot tub area spacious or compact?
Whether it's placed indoors, outdoors, semi-sunken
or even in-ground, a Jacuzzi® Hot Tub can be a soft
addition, or the stunning centrepiece of your space.

1

Select size and massage options
Good news! A hot tub with more
massage combinations only requires
a slightly larger garden footprint.
In some cases, it's only a matter
of a few extra centimetres.

2

Choose Lounge vs. Open Seating
A lounge seat offers a full-body
massage option and a more
secluded spa experience.

An open seating model offers more
massage options and makes it easier
to communicate with one another.

3

Find the collection that's right for you

J-400™
A distinct high-back design, our most
advanced PowerPro® rotational jet
technology, and exclusive Infrared
and Red Light therapy make the
J-400™ Collection one of our best
hydromassage experiences.

JLX®
Contemporary design, industry
leading water care, and exclusive
Infrared and Red Light therapy make
the J-LX® Collection the ultimate
wellness experience.

J-300™
Premium PowerPro® Jets, a unique
Hydrosoothe™ massage pillow, and
ergonomically-designed seating puts
comfort at the forefront in our
signature J-300™ Collection.

J-200™
Thoughtful jet placement, stylish
cabinetry design, and Jacuzzi®
renowned build quality makes the
J-200™ Collection perfect for those
looking for a great spa at everyday value.

J-LX® Collection

Clean, simple lines frame the welcoming water of our newest product family. With our patent-pending IR and Red Light therapy taking hydrotherapy to the next level, we're leading the industry once again, by creating the ultimate wellness experience.

J-LX®

IR + Red Light therapy and True Water™ included on all J-LX® Collection Hot Tubs.

The most extraordinary pause in the world.®

Wellness starts with a world that is well.
Learn more about our sustainability commitments.

Feel yourself transformed.
Immerse yourself in the
experience that made
us a household name.

Feel a weight lift at the
mere thought of warm,
bubbling water.
Let stress wash away
as you step in.

Emerge rejuvenated,
to take on the day.
And let the long-lasting,
refreshing energy transform
your body and mind.
